Certificate of Activities in Steering group of Photocat project

This is to certify that Mr. Jouko Raita from Oy Raita International Ltd participated in the activities of steering group of Photocat project in Department of Chemical Technology, Lappeenranta University of Technology, Lappeenranta, Finland.

The Photocat project titled 'Preparation of nanosized photocatalytic hydrogen generation materials and its feasibility study for industrial applications' started in 2013 and it ends in the end of 2015. The project was a part of Finnish-Chinese Nanotechnology program supported financially by Tekes (Notification of decision: 40229/12, Dnro: 435/322/2012) and by the Ministry of Science and Technology of the People's Republic of China (MOST). Beside Lappeenranta University of Technology (LUT), the project partners were Tianjin University of Science and Technology, China National Academy of Nanotechnology and Engineering, Tianjin Testing Center for Nano Products and China Jiliang University. The research work focused on enhancing hydrogen generation and wastewater treatment technology based on developed photocatalyst materials. The new methods were based by metal ions doping and pulsed electric field assisted production methodology.

Mr. Raita was the director of steering group meetings in 2013-2015. His support during the project has been significant concerning the international collaboration between Finland and China.

Yours Sincerely

Marjatta Louhi-Kultanen
Professor
Thermal Unit Operations/Separation Technology
School of Engineering Science
Lappeenranta University of Technology
